

## Zebra Mussel Awareness

Zebra Mussels have become a threat to all lakes and water ways in the Midwest in the past years. As a matter of fact, Zebra Mussels have been found in 2 lakes here in Omaha.

It is **very difficult** to rid a lake of these invasive forms of marine life.

Being aware that the transport of this treat into our lake is our responsibility. The surest way to prevent contamination is not to put our boat into other lakes and rivers.

Some of us vacation with our boats to other lakes. Please take a look at the following videos to understand this threat and prevent it:

<https://www.youtube.com/watch?v=pHXelbjcr5I>

Boat cleaning:

Omaha Marine offers boat and trailer decontamination.  
Call for a bid: 402.339.9600

If you are taking your boat to other lakes or rivers please let the Lake Manager know.
